Summary

- 11 years of experience in Full-stack Software Development involved in all layers of SDLC.
- Rich exposure in Agile/Scrum Methodologies implementation for project development.
- Experienced in backend and front-end software development.
- Strong knowledge of Web Applications and Web Services.

Skillset

Back-end: C#/.Net Core, NodeJs, REST API, ExpressJs
Front-End: HTML5, Javascript, Typescript, CSS, Angular, React, Bootstrap
Database: MSSQL, NoSQL
Others: Git, Azure Cloud, AWS Cloud, Headless CMS, JIRA, Confluence, Firebase

Detailed Experience

Senior Software Developer (IT Consultant)
LuunaX AB

May 2022 – Present

Clients: CSAM Health Group, Polestar, Volvo Cars

Environment: Angular 14, React, Typescript, C#, .Net 5, MSSQL, Git, Confluence, JIRA, Azure, AWS, Serverless, Github Actions

Responsibilities/Accomplishments:

Led development tasks across front-end and back-end, playing a key role in the entire Software Development Life Cycle (SDLC) for multiple projects.
Provided on-site software development services, collaborating closely with client teams to meet project objectives.
Converted high-level system user and client requirements into actionable development resources, including mockups, specifications, user stories, and prototypes.
Integrated modern and legacy systems across various client environments in Sweden, demonstrating flexibility and expertise in both front-end development with React and TypeScript, and back-end development with C#.
Created production-ready prototypes for major system modules using Angular and TypeScript, ensuring compliance with coding standards and best practices.
Demonstrated the ability to work with incomplete or evolving requirements, filling in gaps to deliver functional and robust designs.

Full-Stack Web Engineer
iScale Solutions

Jun 2018 – Mar 2022

Environment: Mulesoft, C#, ASP.Net MVC, MSSQL, Entity Framework, JavaScript, HTML, jQuery, CSS, Angularjs, Git, Selenium, Confluence, JIRA, Azure DevOps, Anypoint Studio

Responsibilities/Accomplishments:

Developed and maintained 3 interconnected customer-facing websites as the sole developer,
Trained and led other developers on project involvements, coding standards, and new technologies
Migrated outdated legacy system to newer .Net framework increasing overall site uptime to 99.9% and handling traffic of over 50,000 visitors monthly.
Spearheaded the migration of an existing project from traditional Git repositories to Azure project management tools and services, enabling automated deployments that reduced manual intervention by 10 hours per week
Added improvements and followed given requirements for new webpages, modules, and implementations
Implemented new system architecture using object-oriented design principles
Designed and implemented API gateway for container app consumption using Mulesoft API tools and Anypoint Studio
Worked and consulted with onshore teams to integrate web services and design system connectivity requirements

Detailed Experience

Senior Software Developer
Emapta Versatile Services

Apr 2017 – Jun 2018

Environment: C#, ASP.Net MVC, ASP.Net Web API, .Net Core, MSSQL, Entity Framework, Ninject, JavaScript, HTML, jQuery, SASS, Angularjs, gulpjs, AWS (Elastic Beanstalk, S3), OWIN, Git

Responsibilities/Accomplishments:

- Create web pages following angularjs material design while adhering to the front-end architecture requirements
- Create RESTful Web APIs to be used by front-end
- Generate code-first migrations to update the database depending on the requirements
- Deploy build packages to AWS cloud using AWS Elastic Beanstalk
- Optimize existing codes and implementation to further improve the performance of the system

Software Developer
Pointwest Innovations Corp.

Apr 2014 – Apr 2017

Environment: Agile/SCRUM, C#, ASP.Net MVC, MSSQL, PostgreSQL, WCF Services, Windows Services, Entity Framework, JavaScript, HTML, jQuery, CSS, knockoutjs, Bootstrap, Telerik Reports, SVN, OpenLayers Maps, leaflet js

Responsibilities/Accomplishments:

- Led team of 15 developers in ground-up development and maintenance of web applications using WCF services and Windows services connectivity.
- Conducted code reviews, mock-ups, and conceptualizations for current sprint's user stories.
- Interpreted business requirements with the business analyst to create User Stories and assigned tasks to team developers.
- Led sprint planning, retrospective meetings, sprint demos, and other sprint activities as technical lead.
- Participated in architectural planning and executed initial configurations.
- Assessed compatibility of new technologies before applying to existing project interfaces.
- Optimized server response time by refactoring code, reducing it to only 10% of the original.

Education

B.S. Electronics and Communications Engineering
Polytechnic University of the Philippines – Sto Tomas, Batangas

2009 - 2014
