Jayvee Brian Bustarde

SOFTWARE DEVELOPER

Göteborg, Sweden
(+46) 760097052
jayvee.bustarde@gmail.com

Summary

- 9 years of experience in Object-Oriented Software Development.
- Rich exposure in Agile/Scrum Methodologies implementation for project development.
- Experienced in backend and front-end software development.
- Experienced in developing web-based applications using C#.Net, Asp.Net, MVC, Web services, and SQL Server.
- Strong knowledge of Web Applications and Web Services.
- Innovative IT Professional with strong interpersonal and communication skills

Skillset

Back-end:	C#, ASP.NET, .Net Core, Entity Framework, WCF, REST API, Mulesoft
Front-End:	MVC, HTML5, Javascript, CSS, Angular, Typescript, knockoutJs
Database:	MSSQL
Others:	Git, Azure DevOps, Amazon Web Services, Visual Studio, Visual Studio Code, JIRA, Anypoint Studio

Detailed Experience

Senior Software Developer (IT Consultant)   May 2022 – Present
LuunaX AB

Environment: C#, .Net 5, MSSQL, Angular 14, Typescript, Webforms, SaSS, SSRS, Git, Confluence, JIRA, Azure

Project: CSAM Health Group – Paratus project

Responsibilities/Accomplishments:
Full-stack developer consultant, responsible for handling database, backend, and frontend tasks
Translated high-level requirements from system users and clients into development resources (e.g., mockups, specs, user stories, prototypes)
Worked on integrating modern and legacy systems used by multiple clients in Sweden, utilizing C# backend
Designed production-ready prototypes for major modules of the existing system using Angular and TypeScript, adhering to coding guidelines and best practices
Demonstrated flexibility in working with incomplete requirements, filling in the gaps to create functional designs

Full-Stack Web Engineer   Jun 2018 – Mar 2022
iScale Solutions

Environment: Mulesoft, C#, ASP.Net MVC, MSSQL, Entity Framework, JavaScript, HTML, jQuery, CSS, Angularjs, Git, Selenium, Confluence, JIRA, Azure DevOps, Anypoint Studio

Project: Edenred (Japan) – Beneficiary Systems

Responsibilities/Accomplishments:
Developed and maintained 3 interconnected customer facing websites as sole developer
Trained and led other developers on project involvements, coding standards, and new technologies
Migrated outdated legacy system to newer .Net framework and managed project through Azure DevOps
Suggested improvements and followed given requirements for new webpages, modules, and implementations
Implemented new system architecture using object-oriented design principles
Designed and implemented API gateway for container app consumption using Mulesoft API tools and Anypoint Studio
Worked with onshore teams to integrate web services and system connectivity requirements

Detailed Experience

Senior Software Developer   Apr 2017 – Jun 2018
Emapta Versatile Services

Environment: C#, ASP.Net MVC, ASP.Net Web API, .Net Core, MSSQL, Entity Framework, Ninject, JavaScript, HTML, jQuery, SASS, Angularjs, gulpjs, AWS (Elastic Beanstalk, S3), OWIN, Git

Project: Panalitix (Australia/USA) – Engager System

Responsibilities/Accomplishments:
Create web pages following angularjs material design while adhering to the front-end architecture requirements
Create RESTful Web APIs to be used by front-end
Generate code-first migrations to update the database depending on the requirements
Deploy build packages to AWS cloud using AWS Elastic Beanstalk
Optimize existing codes and implementation to further improve the performance of the system

Software Developer   Apr 2014 – Apr 2017
Pointwest Innovations Corp.

Environment: Agile/SCRUM, C#, ASP.Net MVC, MSSQL, PostGreSQL, WCF Services, Windows Services, Entity Framework, JavaScript, HTML, jQuery, CSS, knockoutjs, Bootstrap, Telerik Reports, SVN, OpenLayers Maps, leaflet js

Project: ABS-CBN – Full Internal Traffic System (FITS); Pelican Corp (Australia) – PRAM, Reports Access, Members Portal

Responsibilities/Accomplishments:
Led team of 15 developers in ground-up development and maintenance of web applications using WCF services and Windows services connectivity.
Conducted code reviews, mock-ups, and conceptualizations for current sprint's user stories.
Interpreted business requirements with the business analyst to create User Stories and assigned tasks to team developers.
Led sprint planning, retrospective meetings, sprint demos, and other sprint activities as technical lead.
Participated in architectural planning and executed initial configurations.
Implemented Bootstrap CSS library for responsive user interface.
Assessed compatibility of new technologies before applying to existing project interfaces.
Optimized server response time by refactoring code, reducing it to only 10% of the original.
Fixed UAT issues endorsed by the client by applying build patches.

Education

B.S. Electronics and Communications Engineering   2009 - 2014
Polytechnic University of the Philippines – Sto Tomas, Batangas
